“ My mom was very creative. She was especially good at sewing. Her aunt, Mildred taught her to sew clothes for herself and she continued to sew for her kids and grandkids. My mother taught me to notice and appreciate the beauty of nature. I remember her telling me to look at the sky, flowers, animals and trees. She especially loved birds. Her last days were spent at home watching the birds from the living room window and having the Bible and meditations read to her. I remember her coloring with me and teaching me to cook and bake, especially pie crust. She was a very good cook and her pie pastry was so flaky. She devoted herself to her family and church. My mom loved making babydoll clothes for all the naked babies at the pregnancy counseling center. That's what I remember her working on before she was so sick. I believe it was poisoning from a build up of chemicals probably aluminum. They called it ALS. I call it poisoning. Her mother and her aunt both died of 'neurodegenerative diseases' as well. I've researched it. Evidence suggests aluminum build up in the brain causes these symptoms. And death. I want more people to be aware of this and change the laws. Protest chemicals in our food, air, and water. And in cleaners and topical products. Especially all the chemicals in the processed foods with neurotoxins and emulsifiers in them that cross the brain-blood barrier, allowing the aluminum in our foods to be deposited in our brains. Ask yourself why has neurodegenerative disease increased so much - and cancer, and autism? No one should die such painful premature deaths as what I saw my mother endure. It was truly horrible what she suffered. This is preventable. All of us standing up together for pure food, water and air and no toxic chemicals in our products can end these terrible deaths and pain. Yes, we all die but it should not be in such terrible ways. Europe does not allow these things. They educate themselves on these matters that should be important to us as well. We cannot take the mainstream media or government's word for anything. They are controlled by a few extremely wealthy people who do not have our best interests at heart. Research David Rockefeller and his stance on eugenics. His statements about decreasing the world's population. What he proposed as the means to this end... None of us or our children or loved ones should die like this. Please be brave and bold. Make your voice heard. At the very least don't purchase and support chemical laden foods. Thank you. This is what you can do to help our family and everyone.

“ Cathy was a devoted wife, mother, and grandmother. She and I shared precious grandchildren, Emily and Nicholas. She and Bob frequently traveled to Texas to visit, and I often saw them during those times. She was loving to the grandkids, and they adored her. The last time I saw her was at Emily's graduation. We were very proud grandmothers! I am reminded of her great talent as a seamstress when I saw the christening gown that she made for Emily, which will always be treasured. I will keep Bob and the family in my prayers.

“ Sending our sympathy to Bob and family. I was so sad to hear that she was suffering. I have such wonderful memories of my beautiful cousin Cathy. She was a lovely lady. You and the family are in our thoughts and prayers.

“ Dear Bob and Shollack family
It was with deepest sorrow that we learned of Cathy's sudden passing this morning at our current church "Prince of Peace" in Howell.
One of our members is also a member of the Pregnancy center and I asked what her name was and she mentioned Cathy's name. She was surprised that we knew her for many years from "Our Saviour".
Blessings to all the family

“

Dear Shollack family,

Our hearts are saddened to hear the news of Cathy. However, because Jesus loved her so much and brought her to faith, she now has received the goal of her faith in heaven. Yes, we will miss her visits to Texas. But, her joy in heaven has now overtaken her journey on earth. She remained faithful unto death, and now has received the crown of life with Jesus.

From our hearts to yours! Pastor Hering
